BUNKER SURVEY SCHOOL OF INSTRUCTION
ONLINE

BUNKER SURVEY COURSE SYNOPSIS

The 8-hour program will introduce the student to the methodology of conducting a vessel fuel inventory. Designed for those who have little or no previous experience performing surveys of this type, the program will be presented by an instructor who is an extremely experienced and practicing bunker surveyor in an easy-to-understand format. Using surveys and publications collected from actual vessels attended by the instructor, attention will be directed toward practical survey methodology. Throughout the entire course, the student can expect to be challenged with real-life scenarios while acquiring the fundamental skills necessary to accurately determine the quantity of fuel aboard a ship, specifically:

(1) Fuel tank measurement techniques
(2) Projecting onboard fuel quantity using consumption rates
(3) Application of fuel tank volume tables / application of mathematical corrections
(4) Deciphering unusual vessel tank data
(5) Avoiding common errors

Class is scheduled for 4 hours each session (2 sessions) with homework assignments between each session. The instructor will remain online as needed at the end of each session to answer questions or review. To ensure adequate attention to all students, the online program is limited to 5 participants.

Students completing the program will be awarded a certificate of completion.

Upon request, this program can be submitted for approval for CE credits for members of the National Association of Marine Surveyors (NAMS), Society of Accredited Marine Surveyors (SAMS) and International Institute of Marine Surveyors (IIMS).

Course Tuition:

$750 (Seven Hundred Fifty USD) which includes all course materials, report templates and 1-year of online support / mentorship.

$1200 (private class – one student) ***This program is popular with students that have a busy schedule and cannot commit to predetermined dates.***
